PROPOSAL

WEBSITE REFRESH & GROWTH PARTNERSHIP

Prepared for ROA Industries Unlimited LLC

PREPARED BY

Joshua Greene
THE LOST AND UNFOUNDS LLC.
business@thelostandunfounds.com

PREPARED FOR

Daniel & Team
ROA Industries Unlimited LLC
roaindustriesllc@gmail.com · (956) 264-0888

PROPOSAL DATE **May 18, 2026** VALID THROUGH **June 30, 2026**

THE OPPORTUNITY

01 · OVERVIEW

ROA Industries Unlimited has built a reputation in Texas on discipline, transparency, and a decade of hands-on craftsmanship. Your current Canva site tells that story, but it leaves money on the table — it doesn't qualify leads, doesn't follow up, and doesn't compound over time.

This proposal lays out a refreshed website built around lead capture, plus an optional growth system that turns the site into a measurable revenue channel — with payment processing, automated tracking, and a partnership model where my income is tied directly to the revenue I help you generate.

WHAT WE'VE ALREADY BUILT

A modern, mobile-first website at production quality, with the dark industrial visual identity Daniel approved. The new site replaces the Canva template with a 5-section flow that pushes every visitor toward one outcome: requesting a quote.

- Hero, services grid, project gallery, process/values, testimonials, and a 9-field quote-request form
- Click-to-call (956) 264-0888 in four places throughout the page
- Click-to-email roaindustriesllc@gmail.com in three places
- "Unlimited Standards, Unmatched Results" tagline integrated as the hero headline, page title, and footer mark
- Fully responsive — looks sharp on phones, tablets, and desktops
- Real testimonials from Shay Wu, Chenhao J., and Noel Holmes carried over

WEBSITE LAUNCH

02 · PHASE ONE

INVESTMENT

$500 *one-time*

Standard rate: ~~$1,500~~ · **ROA discount: 67%**

DELIVERABLES

- Refreshed single-page website built on the same Vercel + Supabase stack we use for THE LOST+UNFOUNDS
- Modern dark-mode, sans-serif design matching the ROA visual identity
- Deployed to Vercel with a custom subdomain (and your own domain when you're ready to point it)
- Quote-request form posts to a Supabase Edge Function — leads land in your private CRM database, not a third-party inbox
- Instant email notification to roaindustriesllc@gmail.com on every new lead
- On-page SEO baseline — meta title, description, OpenGraph tags for clean social sharing
- 30 days of post-launch support

TIMELINE

Site is already built. Once you approve this proposal, deployment + domain setup is complete within 48 hours.

WHAT'S NOT INCLUDED IN PHASE 1

Custom photography (we'll swap your real project photos in any time — just send them over), separate gallery pages for Commercial / Residential / Add-ons (available as an add-on for $250), or backend/CRM functionality — that's Phase Two on the next page.

GROWTH PARTNERSHIP

03 · PHASE TWO · OPTIONAL

MONTHLY RETAINER	REVENUE SHARE
$149/mo	**8%** of attributed revenue
Hosting · dashboard · ongoing site management	*Only on website-generated revenue · audit-able via Stripe*

Phase One gives you a website. Phase Two turns it into a measurable revenue channel — and aligns my incentives with yours. I only do well when you do well.

THE SAME CRM THAT RUNS THE LOST+UNFOUNDS

We don't build you a dashboard from scratch. ROA gets onboarded as a tenant on the same platform that runs THE LOST+UNFOUNDS — built on Vercel, Supabase, and Stripe. Same architecture, same reliability, your own private workspace and database. One login, one place to see:

- Live lead pipeline — every quote-form submission, sortable by service type, budget, and timeline
- Drag-and-drop deal stages — new / contacted / quoted / won / lost — updated in seconds
- Contacts and clients with full activity history — every call, email, site visit, and payment tied to one record
- Active project list — what's currently underway, what's invoiced, what's paid, what's owed
- Revenue dashboard — every Stripe payment broken down by job, source, and lead origin
- Monthly performance report — leads generated, conversion rate, revenue attributed to the website

STRIPE INTEGRATION FOR PAYMENTS

You're already on Stripe with us — Daniel gets onboarded as a connected sub-account so he can:

- Send invoices with a "Pay Now" button — clients pay by card or bank transfer in two clicks
- Generate payment links for deposits straight from the dashboard
- Accept ACH bank payments at 0.8% (capped at $5) instead of 2.9% for cards — saves real money on $20k+ jobs

- Get paid faster — clients no longer write checks or visit a bank
- Every payment automatically tagged with the originating Lead ID — the foundation of the 8% rev-share calculation

ONGOING SITE MANAGEMENT

- Vercel hosting, domain renewal, SSL certificate — all handled
- Monthly content updates (new project photos, copy tweaks, new testimonials)
- Supabase-level lead spam filtering and routing rules
- Analytics through the same stack we use for THE LOST+UNFOUNDS
- Quarterly site refresh as your brand evolves

TRANSPARENT REVENUE TRACKING

04 · HOW THE 8% WORKS

The 8% is calculated only on revenue that the website demonstrably generated. Every dollar is traceable. Here's the mechanism:

STEP 1 · EVERY LEAD GETS AN ID, AUTOMATICALLY

When someone fills out the quote form, the Supabase Edge Function creates a row in your private leads table with a unique Lead ID (example: L-0042). That ID follows the prospect through every stage of the pipeline — first contact, estimate sent, contract signed, deposit collected, final payment.

STEP 2 · EVERY STRIPE PAYMENT CARRIES THE LEAD ID

When Daniel sends a Stripe invoice or payment link from the dashboard, the Lead ID is automatically written to Stripe's metadata field on the transaction. Stripe stores it permanently. No manual tagging, no spreadsheet, no "did you remember to track that one" — it just happens.

STEP 3 · MONTHLY REPORT, MONTHLY INVOICE

On the 1st of each month, the dashboard queries Stripe for all payments from the prior month where the metadata contains a website-origin Lead ID, sums them, and applies the 8% rate. I send Daniel a monthly invoice through Stripe (same system he uses for his own clients). He sees the full breakdown in the dashboard — every payment, every Lead ID, every dollar — before he pays.

EXAMPLE MONTH

LEAD ID	PROJECT	TYPE	REVENUE
L-0038	Wu rental remodel	Remodel	$18,400
L-0042	Holmes back yard	Add-On	$12,750
L-0047	Commercial roofing	Commercial	$31,200
		WEBSITE TOTAL	**$62,350**
		8% REVENUE SHARE	**$4,988**

Note: *Walk-ins, repeat clients who already work with you, and referrals that didn't originate from the site are never included. Only website-attributed leads count.*

ALIGNED INCENTIVES

05 · WHY THIS STRUCTURE WORKS

FOR ROA INDUSTRIES

- Low-risk entry — $500 to launch a site that already pays for itself with one new lead
- No big upfront commitment to the dashboard or rev share — opt in only when you're ready
- Every dollar you pay me in Phase Two corresponds to a dollar I helped you earn
- Better cash flow from Stripe payments — clients pay faster, no chasing checks
- Professional reporting — clean numbers for taxes, planning, and growth decisions

FOR THE LOST+UNFOUNDS

- Long-term partnership instead of one-shot freelance work
- Recurring revenue tied to a business I believe in
- Skin in the game — I'm motivated to make your site convert better, not just look pretty
- ROA becomes the second tenant on our platform — proves the system out for future clients

Total investment summary

ITEM	FREQUENCY	PRICE
Phase 1 · Website refresh + deploy	One-time	**$500** *(was $1,500)*
Phase 2 · Growth retainer + dashboard	Monthly	**$149/mo**
Phase 2 · Revenue share	Monthly, performance-based	**8% of attributed revenue**
Extra gallery pages (optional)	One-time	$250

Phase 2 is optional and can start any time — week one or year one. The $500 Phase 1 stands on its own.

THE FINE PRINT

06 · TERMS

PAYMENT

Phase 1 invoice ($500) is due upon proposal acceptance. Payable via Stripe, Zelle, Venmo, or check. Site launches once payment clears (usually same day for Stripe/Zelle).

Phase 2 monthly retainer ($149) auto-charges on the 1st via Stripe. Rev-share invoices issued by the 5th of each month, payable net-15.

OWNERSHIP

ROA Industries owns the website, all source code, all content, and — most importantly — all customer data. Full stop. If we ever part ways, Daniel gets a complete export from Supabase (leads, contacts, deals, invoices, every row) plus the .html file, plus a 30-day handoff window to migrate to a new provider. Your data is never held hostage.

PHASE 2 COMMITMENT

Three-month minimum after dashboard setup so we have meaningful data to evaluate. After that, month-to-month with 30 days written notice on either side. The rev share survives 60 days post-termination for any signed contracts already in the pipeline.

WHAT COUNTS AS WEBSITE REVENUE

Any project where the first point of contact between ROA Industries and the client was the website's quote form, a click-to-call button on the site, or a referral the client tells us came from the site. Walk-ins, existing clients, and non-website referrals are excluded. All payments must flow through Stripe to be tracked.

RIGHT TO AUDIT

Quarterly, Daniel can pull the raw Stripe export to verify the rev-share calculation. The dashboard runs the math but the source of truth is Stripe and Supabase — there's no black box. Daniel owns his Stripe account, his Supabase tenant data, and his Lead IDs.

READY TO LAUNCH?

07 · ACCEPTANCE

This proposal covers Phase 1 only — accepting it commits you to the $500 site launch and nothing else. Phase 2 is a separate conversation we can have once the site is live and bringing in leads.

To accept, reply to this proposal by email or text with "approved" and I'll send the Stripe invoice. Site goes live 48 hours after payment.
