BARBERS

4

STUDIOS

You're opening a fifth studio in San Antonio — so the last thing you need is a website project pulling at your attention. That's the whole idea here: this fixes the one thing quietly costing you bookings, and it's built to run without you. In fact, it already does — a working version is live today.

The reputation is there — 4.9 stars across 4,800+ reviews. But underneath, booking is a patchwork: some barbers on Booksy, some on Squire, some on links that break — no single place to book, no single place to see sales and schedules. A fifth studio only multiplies that. Unify it now and every location you open runs on one system: one front door for customers, one dashboard of real numbers for you.

SEE IT LIVE — ALREADY BUILT

A working preview is live now: thelostandunfounds.com/fadebox-preview — try the booking flow and the owner dashboard at [/fadebox-preview/dashboard](https://fadebox-preview/dashboard). This isn't a mockup you have to imagine; it already runs.

ONE FRONT DOOR. ONE SET OF NUMBERS.

- **A custom black-and-white redesign** — your brand colors, done right: sharp, premium, mobile-first.
- **One booking system for every barber** — today it's a patchwork: some on Booksy, some on Squire, and Daniel through an Instagram link that's currently broken — a booked-out barber you can't reach online. One flow puts all 4 studios and every barber on your own site: no redirects, no dead links, no lost customers.
- **Google reviews — front and center, and growing** — a live marquee of your best reviews across the page, plus an automatic review request after every visit so each barber's Google presence keeps building — including the ones starting from zero today.
- **All four studios, one flow** — Triangle, Off-5th, Box Boyz & Studio in a single switcher — with San Antonio ready to flip the day it opens, for a flat setup fee rather than another build.
- **Owner dashboard & real analytics** — sales, bookings, barber leaderboard and chair utilization across every studio in one screen — the numbers you can't get while barbers are scattered across apps. Open another shop and it just appears.
- **Instant confirmations & no-show protection** — text confirmations, card-on-file, easy rebooking — you keep the traffic, data, and brand.

FLAT RATES. BUILT AROUND YOUR OPENING.

We know your focus is on San Antonio — as it should be. So this is priced and scheduled around it: lock your rate now, and we time the build so it never competes with the opening.

Pricing is per studio, because that's how the work actually lands — four shops and 26 barbers today, five by the time this is running. It's also how Booksy and Squire already bill you, except their number climbs with every chair and none of it builds anything you own.

ITEM	FREQUENCY	PRICE
Phase 1 · Redesign + In-House Booking Build Full black-and-white redesign, barber-first booking across all 4 studios and 26 barbers (replaces Booksy and Squire), Google reviews integration, owner dashboard with per-studio reporting, 30-day post-launch support.	One-time	\$6,000 \$5,100 if you commit by Sept 8
Phase 2 · Hosting & Maintenance Retainer Keeps the site and booking live, integrations healthy, and covers minor tweaks. Billed per studio, so it tracks the business rather than a fixed guess. Does NOT include new features.	Monthly	\$150/studio \$600/mo at 4 · 3-mo min
New Studio Onboarding (San Antonio onward) Stands a new location up inside the existing system — barbers, chairs, hours, services, reporting. No rebuild, no second platform: it's live the day you open the doors.	Per studio	\$500 from studio #5
New Features (when you want them) Loyalty, gift cards, product sales, SMS campaigns — each scoped and quoted flat-rate before any work begins.	Per scope	From \$300 quoted before work starts
MOVE BY SEPT 8 — 15% OFF PHASE 1	Locked-in rate	\$5,100 was \$6,000

NEW SITE. NEW PHOTOS, NOT LAST YEAR'S PHONE SHOTS.

A rebuild is the moment to replace the imagery — the site is only ever as sharp as what's on it. Right now the barber photos are inconsistent: different lighting, different crops, some pulled off Instagram. One pass across all four shops fixes it, and every barber ends up with a headshot that matches the brand.

ADD-ON	FREQUENCY	PRICE
Studio Content Day Half-day on site: the room, the chairs, the details — plus a headshot for every barber working that day. 30–50 edited photos and 2–3 vertical clips per shop.	Per studio	\$800 \$2,800 for all four
Launch Film Full day. A 60–90 second brand film for the site, cut down to verticals for Instagram and TikTok.	One-time	\$1,400 full-day rate
Grand Opening Coverage — San Antonio Event coverage the day you open: photos and vertical video, back to you within 48 hours while it's still worth posting.	Per event	\$600 3–4 hours on site
New Barber Headshots (as you hire) Matched to the original lighting and crop, so a barber who starts next year doesn't stand out against the rest of the roster.	Per session	\$250 same-week turnaround
LAUNCH CONTENT PACKAGE — ALL FOUR STUDIOS	One-time	\$4,400 à la carte \$5,200

WHAT YOU GET, AND WHAT YOU KEEP

The package is four studio content days, the launch film, and opening-day coverage in San Antonio. Everything is licensed to you outright — Fadebox owns the images and uses them anywhere, forever — and delivery runs through your own gallery on the site, not a third-party link that expires.

LOCK THE RATE NOW. CHOOSE THE DATE LATER.

THE 15% IS YOURS IF YOU MOVE THIS MONTH

Say the word by **September 8** and Phase 1 holds at **\$5,100** — even if you'd rather we don't start building until San Antonio is open. From there it stays light on you: a short kickoff, one review before launch, and **you stay as involved as you feel you need to be**. Lock the rate now, choose the kickoff date later.

Acceptance. No rush — this stands through **November 30**, and with the opening on your plate we mean that. To hold the 15%, just reply "*approved*" by September 8; we'll send the deposit and pencil in a kickoff for whenever you're ready. 50% starts the build, the balance is due at launch, and you're live within three weeks of kickoff. Fadebox owns the site, the code, and every bit of customer and booking data — export it any time.
