PREPARED FOR

[Your Studio Name]

[City, State]

PROPOSAL DATE
July 3, 2026VALID THROUGH
August 31, 2026

YOU CREATE THE ART. YOUR WEBSITE BRINGS THEM IN.

Independent tattoo artists build their reputation one piece at a time — but the booking process often lives scattered across Instagram DMs, phone tag, and word of mouth. A dedicated website changes that. It puts your portfolio, your booking flow, and your deposit collection in one place that works for you around the clock, not just when you're online to answer a message.

This is a website built specifically for how independent artists work: a clean portfolio that shows off your best pieces, a booking system that turns interest into scheduled sessions, and a dashboard where you manage it all from your phone or a laptop.

I built this platform for my own business and it's been running in production. You get a custom version of that same system, shaped around your style and your studio.

WHAT CHANGES FOR YOU

- **Bookings come through the system** — Clients submit requests with references and style details directly through your site. No more losing track of a DM from three weeks ago.
- **Deposits are handled automatically** — Payment collection is built into the booking flow. Your spot is secured before it hits your calendar.
- **Your portfolio speaks for itself online** — A gallery built to show your work at its best, available any time someone wants to see what you do — not just when they catch your latest post.

EVERYTHING AN INDEPENDENT ARTIST NEEDS — BUILT AND READY.

THE WEBSITE

- **Custom landing page** — built around your name, your style, and your visual identity. Not a template you're squeezed into.
 - **Artist bio** — your story, your specialties, and what makes your work distinct, presented the way you want it told.
 - **Portfolio gallery** — a dedicated space to showcase your best pieces, organized however makes sense for your work.
 - **Style showcase** — highlight the specific styles you specialize in, so the right clients find you.
 - **Location, hours & contact** — everything a prospective client needs to know before they reach out.
 - **Mobile-first & SEO-optimized** — built to look sharp on a phone and to surface in searches for your style and city.
-

BOOKINGS & PAYMENTS

- **Online booking request flow** — clients select a style, upload reference photos, and submit a request directly through the site.
 - **Deposit collection** — secure payment processing built into the booking flow, so appointments are confirmed with a deposit in hand.
 - **Appointment tracking** — every request and confirmed session is logged and organized, no more relying on memory.
 - **Payment processing** — accept deposits and full payments from any device.
-

THE DASHBOARD

- **Admin console** — manage bookings, view client info, update your gallery, and track revenue from one screen.
- **Booking management** — review incoming requests, confirm sessions, and keep your schedule current.
- **Client information** — contact details, reference photos, and session history, all in one searchable place.
- **Revenue tracking** — see what's coming in and what's outstanding at a glance.

FROM FIRST CLICK TO FINAL SESSION.

The platform is built to guide a client from discovering your work to sitting in your chair — with every step tracked along the way.

THE CLIENT JOURNEY

- A client finds your website — through search, a shared link, or your social profile.
- They browse your gallery and get a feel for your style and past work.
- They submit a booking request with reference photos and style details.
- They pay a deposit to secure the appointment.

YOUR SIDE

- You review the request in your dashboard, with the deposit already confirmed.
- You approve, schedule, and prepare for the session with everything you need already on file.
- The session happens.
- The client's record stays in your system, ready for the next time they book.

ADD-ON FEATURES

Once your core site is live, additional features are available whenever you want them — flash sale pages, a merch storefront, email marketing, AI-powered booking estimates, digital waivers, or multi-artist support for a shared studio. Each add-on is scoped and quoted before any work begins, starting at \$300 per feature.

WHAT THIS WOULD COST ANYWHERE ELSE.

The price reflects a white-label deployment of existing, production-grade systems — built on infrastructure already running in production. Here is what you would pay at standard freelance and agency rates for the same scope of work.

COMPONENT	MARKET RATE	YOUR PRICE
Custom website design & development	\$3,000 – \$8,000	Included
Online booking system	\$2,000 – \$5,000	Included
Payment processing integration	\$1,500 – \$3,000	Included
Portfolio/gallery system	\$1,000 – \$3,000	Included
Admin dashboard	\$3,000 – \$8,000	Included
SEO optimization	\$500 – \$2,000	Included
Total market range	\$11,000 – \$29,000	\$2,000

WHY THE DIFFERENCE

A traditional developer builds every component from zero. I am deploying established systems that already exist, are already tested, and are already running in production. The core infrastructure — authentication, payment processing, email delivery, admin dashboards, API architecture, database design — represents over 2,000 hours of development. All of that work comes with the platform. The \$2,000 covers the time to configure, customize, and deploy these systems for your specific site.

AI COACHING & GUIDANCE

You are also getting a partner who knows these tools well and can help you get the most out of them. I will show you how to use AI to streamline your day-to-day — from generating social media content to managing client communication. This is practical, hands-on guidance tailored to how you actually work.

FLAT RATES. FULL TRANSPARENCY. FULL SUPPORT.

ITEM	FREQUENCY	PRICE
Artist Website Platform Custom landing page, portfolio gallery, booking request flow, deposit collection, payment processing, and admin dashboard.	One-time	\$2,000
Maintenance & Support Keeps integrations alive, fixes anything that breaks, minor tweaks and updates. New feature modules are scoped and priced separately.	Monthly	\$150/mo 3-mo min · cancel anytime after
Add-On Features Each new module is scoped and quoted flat-rate before any work begins. Every invoice is agreed upon before work starts.	Per scope	From \$300 quoted before work starts

WHAT COMES WITH EVERY ENGAGEMENT

30 days of post-launch support — after delivery, I am available to troubleshoot and fix any issues that come up. Direct access, direct response.

Weekly or daily check-ins — your choice. We can do a quick daily update or a weekly review. Whatever keeps you informed and confident.

Live preview link — from the moment work begins, you have a live link to the preview deployment. Watch features appear in real time. Click around, test things, give feedback as it grows. Full visibility into every feature as it ships.

AI coaching — practical guidance on using AI tools to streamline your day-to-day. Tailored to how you work.

TIMELINE & PAYMENT TERMS

\$1,000 deposit due to begin work. Balance of \$1,000 due on launch day. Delivers within 3 weeks. Maintenance billed monthly starting on final launch date. Development tools (Claude Max plan, hosting infrastructure, domain management) are my overhead, covered in the build cost.

Acceptance. Reply by email or text with *"approved"* to receive the deposit invoice. You own the website, the source code, and all your data — full export

available any time.
