LIVE PREVIEW — WATCH FEATURES APPEAR IN REAL TIME AS WE BUILD

PREPARED BY

Joshua Greene

THE LOST AND UNFOUNDS LLC.

business@thelostandunfound.com

PREPARED FOR

Kattitude Tattoo Studio

Austin, Texas

PROPOSAL DATE

June 21, 2026

VALID THROUGH

July 31, 2026

YOU CREATE THE ART. THE PLATFORM RUNS THE STUDIO.

Kattitude has an established presence — kattitude.com, a Shopify store, a loyal client base, and a team of working artists. What comes next is a central operations hub: a single system that consolidates appointment tracking, deposit management, artist schedules, client records, and daily studio administration. Today those pieces live across DMs, memory, and paper. This platform brings them together into one dashboard, accessible by Kat and her artists from any device.

Phase 1 is the studio operations platform. The client-facing landing page is the front door — built around the Kattitude brand and connected directly to the booking and client management flow behind it.

I built this platform for my own business and it's been running in production. Your studio gets a custom version of that same system, shaped around how you operate.

WHAT CHANGES FOR YOU

- **Operations move into the system** — Appointment tracking, deposit management, artist scheduling, and client records all live in the dashboard. What lives in memory or on paper today becomes searchable, trackable, and always current.
- **Artists have their own access** — Each artist logs in to see their schedule, review client reference photos before a session, and check upcoming appointments. Scheduling visibility replaces the back-and-forth.
- **Everything visible at a glance** — Revenue, outstanding deposits, booked appointments, client history — one screen, any device. Information that used to require digging is always in front of you.

PHASE 1 — THE COMPLETE STUDIO OPERATIONS PLATFORM.

THE DASHBOARD

- **Studio admin console** — appointment overview, revenue at a glance, outstanding deposits, client roster, and artist schedule — all on one screen. The command center for daily studio operations.
 - **Artist portal** — each artist gets their own login. They see their upcoming schedule, review client reference photos before sessions, check session notes, and clock in and out. Schedule visibility replaces the back-and-forth.
 - **Client management** — full client history in one place: contact info, session history, signed waivers, and uploaded reference photos. Every client record accessible and searchable.
 - **Appointment & deposit tracking** — log new appointments, track deposits paid and outstanding, mark sessions complete. The ledger that currently lives on paper or in memory moves into the system.
 - **Digital waiver system** — clients sign waivers on a tablet or phone before every session. Stored permanently with the client's name, email, and consent timestamp.
-

PAYMENTS & MERCH

- **Payment processing** — Stripe integration for deposits and full payments. Process transactions from any device — phone, tablet, or studio computer.
 - **Merch storefront** — sell branded merchandise on the site and in-studio. Product management, inventory, and checkout built in.
-

CLIENT-FACING FRONT END

- **Landing page** — designed around the Kattitude brand, mobile-first, artist profiles with portfolios, studio info, hours, location, and booking CTA. SEO-optimized for "tattoo studio Austin TX" and related searches.
- **Booking request flow** — clients submit appointment requests, select a style, upload reference photos, and receive confirmation. Every request lands in the dashboard for review and scheduling.
- **Platform console** — webmail, customer management, reports, and settings — the same production-grade console running in production.

THE DASHBOARD IN STUDIO LIFE.

The dashboard becomes the operational backbone of the studio — the place Kat and her artists start and end every day.

STARTING THE DAY

- The dashboard opens to today's appointments, which artists are checked in, and any deposits outstanding for upcoming sessions.
- Clients with appointments that day have their reference photos, session notes, and signed waivers accessible from the same screen — reviewed before they walk in the door.
- Booking requests from the website appear in the queue, ready to review, approve, schedule, and confirm a deposit.

DURING THE DAY

- Artists clock in from their phone or a studio tablet. Their active session is logged. Breaks are tracked.
- When a client checks in, the artist pulls up reference photos and session notes directly from the booking record.
- Payments and merch purchases process through the same system — Stripe on any device.

END OF DAY

- Artists clock out. Hours are logged and available for scheduling reference.
- Completed sessions are marked. Client records update — their history is already there when they book next time.
- Revenue, sessions completed, and outstanding deposits reflect on the dashboard overview.

WHAT'S NEXT — PHASE 2

Once Phase 1 is running and the studio's operations are in the system, Phase 2 adds an AI-powered booking engine. Clients upload reference photos during booking and receive an estimate based on complexity, placement, size, and style — calibrated against your artists' actual session history. Smart scheduling shows real availability based on each artist's speed and current workload. Phase 2 carries its own scope, timeline, and proposal, and launches once Phase 1 is live and your data is flowing.

AI-POWERED BOOKING SYSTEM

WHAT THIS WOULD COST ANYWHERE ELSE.

The price reflects a white-label deployment of existing, production-grade systems — built on infrastructure already running in production. Here is what you would pay at standard freelance and agency rates for the same Phase 1 scope of work.

COMPONENT	MARKET RATE	YOUR PRICE
Custom website design & development	\$3,000 – \$8,000	Included
Admin dashboard & client management	\$4,000 – \$12,000	Included
Online booking & request system	\$2,000 – \$5,000	Included
Payment processing integration	\$1,500 – \$3,000	Included
Artist time tracking & check-in system	\$1,500 – \$4,000	Included
Merch storefront	\$2,000 – \$5,000	Included
Digital waiver system	\$500 – \$1,500	Included
Email automation & platform console	\$2,000 – \$4,000	Included
Total market range — Phase 1	\$16,500 – \$42,500	\$2,000

WHY THE DIFFERENCE

A traditional developer builds every component from zero. I am deploying established systems that already exist, are already tested, and are already running in production. The core infrastructure — authentication, payment processing, email delivery, admin dashboards, API architecture, database design — represents over 2,000 hours of development. All of that work comes with the platform. The \$2,000 covers the time to configure, customize, and deploy these systems for your specific studio.

AI COACHING & GUIDANCE

You are also getting a partner who knows these tools well and can help your team get the most out of them. I will show you how to use AI to streamline studio operations — from generating social media content to managing client communication. This is practical, hands-on guidance tailored to how your studio actually works.

FLAT RATES. FULL TRANSPARENCY. FULL SUPPORT.

ITEM	FREQUENCY	PRICE
Phase 1 · Studio Operations Platform Admin dashboard, artist portal, client management, appointment and deposit tracking, digital waivers, payment processing, merch storefront, platform console, landing page, and booking request flow.	One-time	\$2,000
Maintenance & Support Retainer Keeps integrations alive, fixes anything that breaks, minor tweaks and updates. New feature modules are scoped and priced separately.	Monthly	\$300/mo 3-mo min · cancel anytime after
New Features (when you want them) Each new module is scoped and quoted flat-rate before any work begins. Every invoice is agreed upon before work starts.	Per scope	From \$300 quoted before work starts

WHAT COMES WITH EVERY ENGAGEMENT

30 days of post-launch support — after delivery, I am available to troubleshoot and fix any issues that come up. Direct access, direct response.

Weekly or daily check-ins — your choice. We can do a quick daily standup or a weekly review. Whatever keeps you informed and confident.

Live preview link — from the moment work begins, you have a live link to the preview deployment. Watch features appear in real time. Click around, test things, give feedback as it grows. Full visibility into every feature as it ships.

AI coaching — practical guidance on using AI tools to streamline your studio operations. Tailored to your team and your workflow.

TIMELINE & PAYMENT TERMS

\$1,000 deposit due to begin work. Balance of \$1,000 due on launch day. Phase 1 delivers within 3 weeks. Retainer billed monthly starting on final launch date. Development tools (Claude Max plan, hosting infrastructure, domain management) are my overhead, covered in the build cost. Phase 2 — the AI booking engine — is scoped and proposed separately once Phase 1 is live.

Acceptance. Reply by email or text with "*approved*" to receive the deposit invoice. Kattitude Tattoo Studio owns the website, the source code, and all customer data — full export available any time.
